

3100 | Integrated Communications Platform

Your small business depends on the ideal mix of customers, cost control and employee productivity. The Mitel Networks™ 3100 Integrated Communications Platform (ICP) is designed with those goals in mind. It is a complete, easy-to-use and secure small business communications solution that integrates an advanced telephone system, a local area network (LAN) and a gateway to high speed Internet access at the touch of a button. It is simple and cost-effective, keeping you in touch with your customers and employees, even while on the road.

Simplify your office communications

The Mitel Networks 3100 Integrated Communications Platform (ICP) simplifies office communications, whether you have one office or many, offering everything required to support phones, fax machines, computers, printers, scanners, high speed Internet connectivity and more, all in one box and over one wire. The result is a complete, cost-effective communications system that is easy for your staff to use and maintain. With it, you'll be more responsive to your customers, improve your employees' productivity, even support teleworkers, mobile employees and staff in remote or branch offices.

Expand your solution as you grow

As your business grows you need to accommodate new employees with communications tools. The Mitel Networks 3100 ICP is a flexible, modular solution that is easy to expand as your company changes. You can easily add and change user profiles via a simple web interface, connect new phones, computers and remote workers – all without the help of a service provider or installer.
